

I am asking you to please improve the closed captions on TV. This is my only source of hearing. It is very important that all TV be required to have closed caption. If you can hear why shouldn't I. There has been times when there is bad weather heading my way and if a close friend or family member did not call me I would have had no idea that there was anything wrong. What if there is an emergency and there is no closed caption for me to hear. You are able to change this situation. I'm sure if you had no hearing that this would be any easy choice for you! Walk in my shoes for a day and then make your decision. What will you do about this problem??? Will you make a difference or be any average JOE??????????????
